

Enable Future-Ready  
Healthcare with Dell Displays  
and Peripherals.

# Acute Care – Fixed

## Capsa Healthcare Wall Cabinet Workstation

Place equipment and technology where it's needed, for enhanced caregiver and patient interaction. Ensure a computer workstation, display, and peripherals are always accessible with a wall-mounted solution. Dell offers several client product lines—OptiPlex, Precision, Latitude, and Wyse thin client—and partners with industry leaders in the healthcare IT space. Designed to promote a professional appearance specific to healthcare environments.

## Integrated Solutions by

### Capsa Healthcare

Capsa understands the role that mobile computer carts and fixed workstations play in your clinical IT healthcare program. Focusing on providing caregiver workflow advantages and improving the integration and acceptance of technology into the patient care process. Solutions for healthcare facilities striving to enhance patient care, safety and staff productivity, they design carts and workstations to be ergonomic, lightweight and customizable. Innovative products to support modern healthcare delivery.

### Elo Touch Solutions

Elo Touch Solutions is a leading brand in touch products and technologies. The recognized quality and reliability of Elo touch-based products results from a design that incorporates easy to read displays and responsive touchscreen interfaces, with a sealed casing that protects against liquid splashes. This allows the display to continue operating accurately even when subjected to water drops or other substances. Equally at home in a busy clinic or waiting room, Elo touchscreen products can be activated with a finger, rubber-gloved hand, or stylus—all common in healthcare settings.

### Seal Shield

Seal Shield is a world leader in infection control technology, specializing in washable electronics and antimicrobial science. Seal Shield designs and manufactures medical-grade infection prevention technology for hospitals and the home, including UV disinfection devices, waterproof keyboards and mice, screen protectors, and TV remotes with antimicrobial product protection. Seal Shield's keyboards and mice are 100% waterproof, able to be cleaned with medical-grade sprays and wipes (or even soaked in bleach or washed in the dishwasher), and are certified to IP-68 (the highest rating against dust, debris, and ingress).

# Acute Care – Mobile

## Ergotron StyleView Cart with Optional Anton Bauer Hot Swap Power System

Maximize time available for patient care, improve productivity, and personalize solutions to suit your team's workflow. The innovative, ergonomic, easy-to-maneuver StyleView non-powered cart can be used as is or add the lightweight Anton Bauer hot swap power system for flexible power capability. Supports Dell's OptiPlex micro form factor, Latitude notebook, or Wyse thin client and a multitude of specialty input/output devices. Engineered to meet the exacting requirements of the healthcare industry, and built tough enough to withstand daily use in the most demanding environments.

## Integrated Solutions by

### Ergotron

Ergotron can help your clinic, physician office or hospital improve electronic medical records access: StyleView carts are designed for nurses to expand the reach of care; computer wall mount systems fit most any space, enhancing workflow and caregiving. With a human-centered design, each Ergotron product adapts technology to the varying physical needs of individuals, creating an environment that promotes wellness while improving productivity and efficiency. Ergotron brings over 20 years experience in the healthcare space, Ergotron is uniquely qualified to help you configure options and design workstations that fit workflow throughout the entire facility.

### Honeywell

With hundreds of thousands of barcode solutions installed in healthcare facilities, Honeywell has the expertise needed to help hospitals solve their toughest data collection challenges. Their innovative healthcare scanners with disinfectant-ready housings are designed to allow healthcare professionals to execute patient safety while minimizing the risk of spreading infectious diseases. Honeywell's Xenon healthcare scanner has long been the choice for best-in-class healthcare organizations and is well-suited for a wide variety of applications. Honeywell's new Android Clinical Smartphone product family is ideal for Unified Communications and bedside mobile data collection application deployments.

### Dell Medical Monitors

The Dell Medical Review Monitor MR2416 is designed to perform in the rigors of the healthcare environment. The 24-inch IPS panel in 16:10 aspect ratio, is fully DICOM part 14 out-of-the-box ensuring a superior viewing experience for secondary review or everyday EHR logging. Designed to meet the medical safety requirements of medical equipment (ISO13485) and rated for near patient use (UL-60601) the MR2416 is aligned with infection control initiatives by the IP-32 rating enables a fully washable design, via a smooth, light-colored exterior for enhanced cleanability.

# Diagnostic Radiology

Unparalleled Solutions from  
the World's Leaders in  
Healthcare Technology

Image quality and consistency are paramount to achieving a confident diagnosis, and ultimately, a successful course of treatment. Combining the computing power of Dell Precision workstations with Barco display systems help radiologists diagnose confidently and efficiently to read more studies per day. Dell and Barco ensure compatibility and together provide a robust solution with high uptime and reliability.

Barco technologies go beyond pixels and lumens to enhance even the subtlest details to aid in precise detection at the earliest possible stage. Meticulously designed for faster image loading, creating a more streamlined workflow, and delivering crystal-clear images that are easy on the eyes.

## Integrated Solutions by

### Barco Diagnostic Display Systems

As the worldwide leaders in healthcare, Dell and Barco invest heavily in the development of new technologies to solve real world problems, enabling providers to deliver better patient care. The Barco solution families of Nio and Coronis display systems (2 million to 12 million pixels) address PACS and mammography reading requirements with superior image quality in grayscale, color, moving and static images.

Combined with the computing power of the Dell Precision workstation, the Barco Coronis and Nio solutions enable customers to diagnose confidently, improve productivity and care for more patients per day.

### Anthro/Ergotron

Anthro's mission is to design furniture for technology that keeps you comfortable and productive. They are committed to providing the highest quality furniture for technology—like the Carl's Table and Steve's Station offerings, with exceptional customer service. Offerings include heavy duty, configurable small mobile carts to take your equipment wherever you need it. Whether you're looking for PACS furniture for a reading room or mobile carts for the OR, you'll find lots of innovative ergonomic furniture choices from Anthro.

### Tripp Lite

Tripp Lite offers complete solutions for healthcare facilities with more than 3,000 available products. From the server room to the patient room, Tripp Lite's affordable and reliable IT infrastructure solutions power, protect, secure, cool, control, manage, and connect your medical and non-medical electronic equipment. More importantly Tripp Lite's medical-grade solutions are certified to meet UL standards for environments across medical facilities—from within a 6-ft radius of a patient-care area (UL 60601-1 standard required) to mobile applications like power strips on IV poles (UL 1363A standard required), Tripp Lite ensures your facilities are safe and compliant. And with our new charging carts, we can offer secure storage for tablets and other mobile devices—perfect for nurse's stations!
